

Android-ERP

ERP/CRM/HRM Business Accounting

from

YEPPA SOLUTIONS

YEPPA is YES to fullest extent

Understanding our clients

- ❖ You cannot be in control of a business if you don't know what is going on. With bad numbers, or no numbers, a company is flying blind, and it happens all of the time.
- ❖ Anyone who started their business using standard stationary, excel spreadsheets, or a plain double entry solution, or similar, and switched to Android-ERP Business will testify they never looked back.

1. You must have full control of:-

- ✓ Efficiency. This is *only* attainable by automating all aspects of your business.
- ✓ Global opportunities. Be able to quote, invoice, order, and dispatch in any currency.
- ✓ Your stock, orders, returns, repairs and warranty's. You must be able to track stock from supplier to stock to customer and back.
- ✓ Accounts payable and accounts receivable. You must know at any moment who owns you money (debtors), and to whom you own money (creditors).
- ✓ Staff expenses, time and attendance, leave. Know who is really earning their salary. Also determine how to apply staff incentives and bonuses.

2. You must have full control of:-

- ✓ Projects, jobs, tasks, timesheets, meetings, and customer satisfaction. Manage access, expenses, discounts, billing and workflow in detail.
- ✓ Terms and conditions applied to quotes, orders, invoices, deliveries, etc. Avoid confusion and predatory lawsuits with standard and custom terms and conditions.
- ✓ Document management. Manage all documents in a sensible and related way to quotes, jobs, and contacts.
- ✓ Your business wherever you are in the world. We can provide remote app and remote desktop access to your business system via any smart device with an internet browser from a trusted OEM partner. Even if your Android-ERP system is installed and shared from your notebook at home.
- ✓ Your business data and software. Whether you choose client/server, cloud, or hybrid, you own the software with your data. You can sell access to your client/server or cloud server by installing multiple instances as a value-added business service. Contact us for special pricing on this option.

Module shortlist

- ❖ Quotes and estimations, pro-forma invoices, sales invoices, purchase orders, deliveries and dispatching, jobs , tasks, job cards and timesheets, time and attendance, document management, repairs and costing, vendor procurement, enquiries, product listings with bill of materials, multi-location serialized stock and inventory, account payments and statements, accounts payable and receivable, faxes and notes, sms, sales commission, user access control, customer and vendor accounts, staff accounts , staff leave, staff costing, staff diary, staff messaging, scheduler, calendar of appointments, and more.

Type of industries

- ⊕ ERP/CRM/HRM business accounting for **entry and small business** segments in pc, cloud, client/server, and hybrid solutions.
- ⊕ Manufacturing, Buy and Sell, Services, Repairs and Maintenance, Warehousing and Stock Management, All types of Farming, Construction, Automation.

Investing in the future

- ◆ Android-ERP will empower the entrepreneur who starts his own business.
- ◆ Free access to online forums will be available to ALL users of Android-ERP.
